

Day Use Lockers

Storage for an evolving workplace

Function & Aesthetics

STORAGE MADE SLEEK

The way people work and learn is evolving, and with it, the way they interact with the spaces where they work.

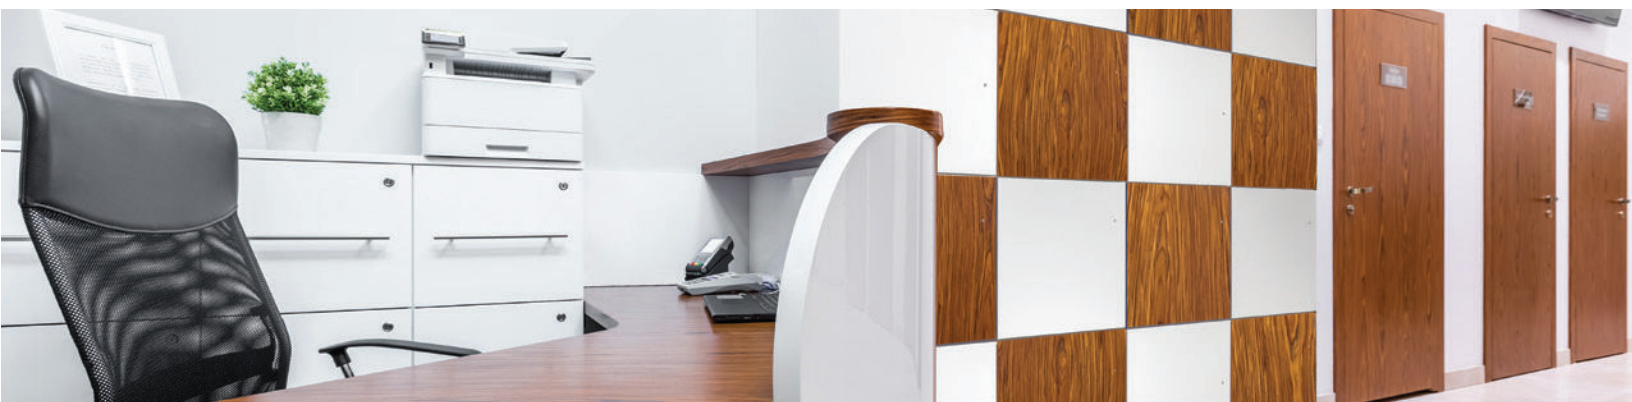

Designing an environment to accommodate these changes requires a human-centered approach, one that gives equal weight to function and aesthetic. Spacesaver Day Use Lockers live at this intersection, allowing your organization to adapt to the need for more convenient, flexible spaces, while blending seamlessly with your building's overall design.

Because "practical" can still be stylish.

Day Use Lockers are a smart, secure way to store personal items wrapped in a sleek design that can be customized with the configuration and accessories you need for your work environment.

In the Office

66% of the companies surveyed by CBRE plan to adopt a shared desk strategy by 2020.

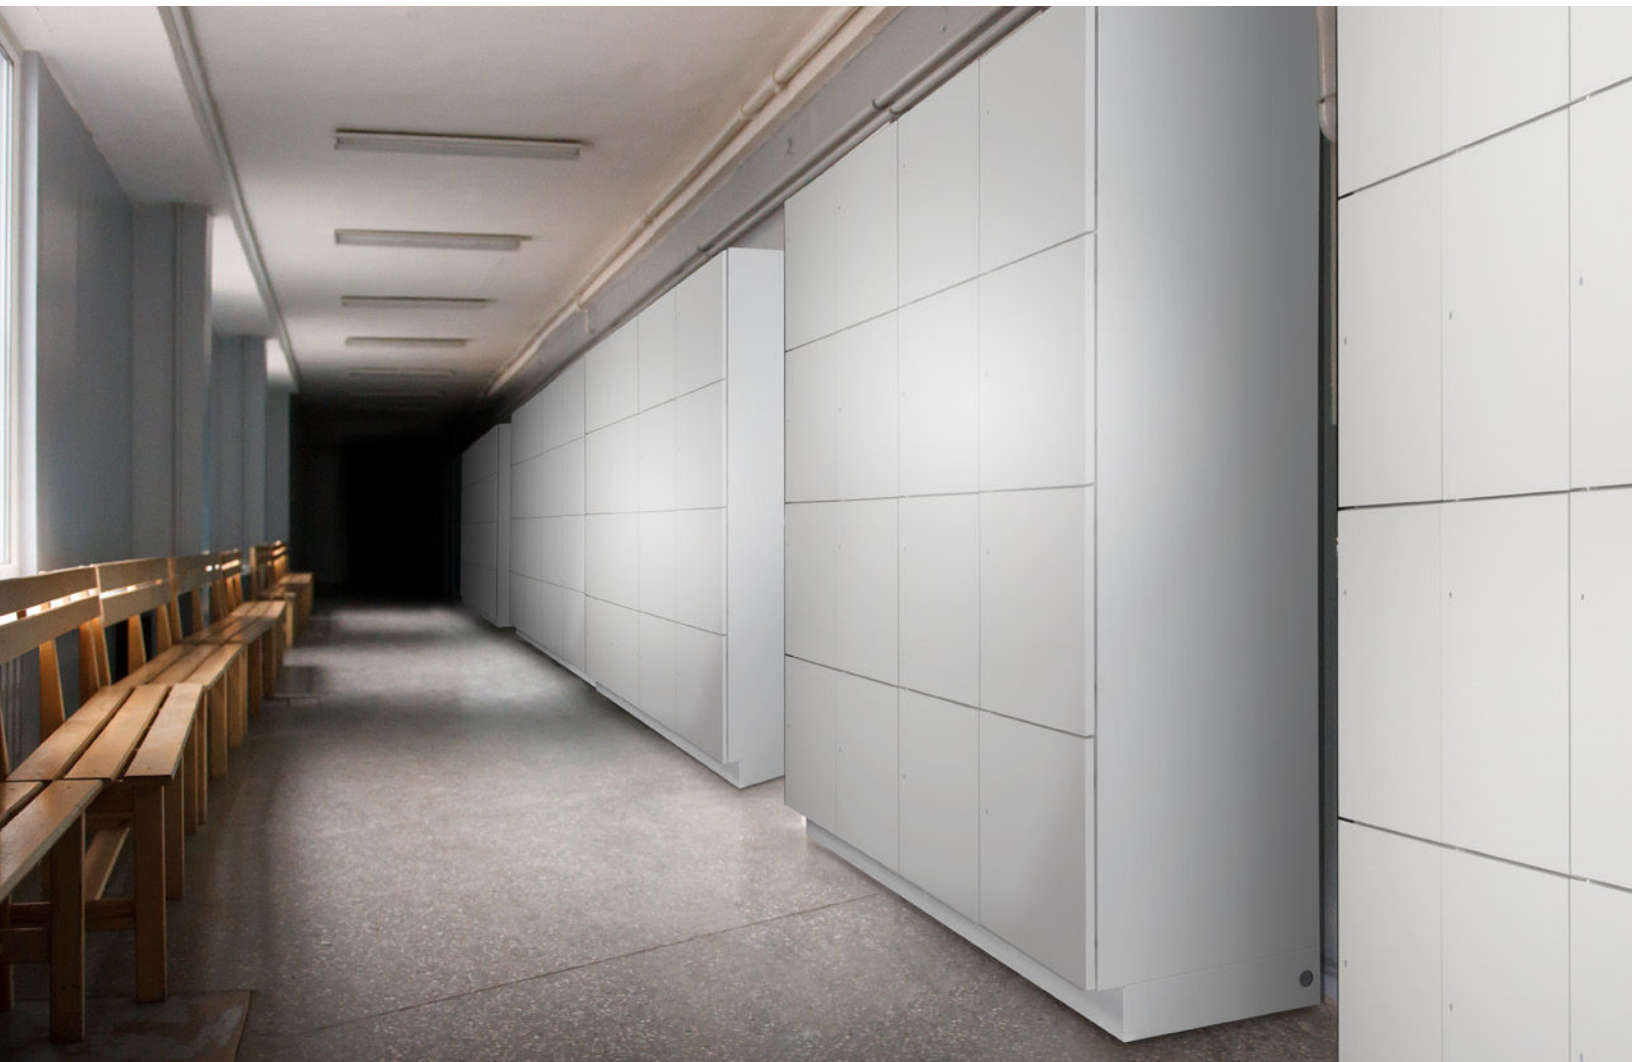

With more employees working remotely and an increased desire for alternative workstations, more companies are creating work environments with more communal space for individual and collaborative work. In fact, according to a report by CBRE, 66% of companies surveyed plan to adopt a shared desk strategy by 2020. Day Use Lockers are a sleek alternative to personal desk/cabinet storage for stashing files, briefcases, gym bags, and office supplies in shared desk environments. Plus, they're an efficient way to make use of empty wall, island, or under-desk space.

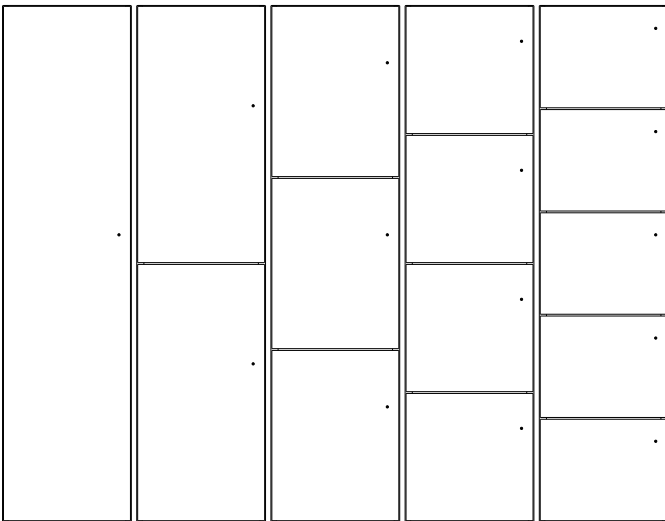

On Campus

When students and staff need a secure place to stow their bag while they're in a classroom, lab, testing center, dining hall, or gym, Day Use Lockers are the perfect solution for keeping items secure and nearby. Electronic locks provide ease and peace of mind, while optional interior charging provides convenience on-the-go.

CONFIGURATIONS STYLES, & OPTIONS

Day use locker adapts to your needs, and your space, from the start. Here's a system that's available in a full range of dimensions: with heights from 24 to 96 inches, depths from 12 to 24 inches, and widths from 12 to 24 inches (1" increments).

	HEIGHT	WIDTH	DEPTH
