EXTRA-LARGE MUSEUM TRAYS

Engineered-to-order cabinet and trays for storing bison hides

Spacesaver designed and manufactured this prototype cabinet with custom-fitted trays for a Western museum that needed to store bison hides. The cabinet measures 7' tall by 8' wide by 7' deep, and the trays are designed with aluminum inserts to maintain strength while minimizing the cabinet's overall weight.

The cabinet has a number of unique features. In addition to custom trays, it's also designed with lockable bi-fold doors, Hansen handles, and leveling mechanisms. Its tray guides can be reconfigured on one-inch increments to maximize space. The cabinet can be assembled at the factory or assembled in place; this feature saves on shipping costs and is a practical solution for institutions with space constraints.

Spacesaver's highly specialized engineering and manufacturing teams can work with clients and their local Spacesaver distributors to create sturdy storage solutions for any need. Contact us for more information.
