

ELEMENTS

Solid, smart workspace solutions.

AGATI's Elements Desking System is a smart solution to any workplace. Comprised of a series of streamlined and structurally sound components, the Elements Desking System is versatile in function and sleek in style. Whether it's a single private office or an eight person computer station, Elements adapts to fit the number of users as well as their individual and group needs.

Originally designed for a Manhattan hospital looking for efficient use of space and workstations that would stand up to everyday rigors of a fast paced, heavily used environment, the Elements System transcends markets. Institutional clients immediately recognized the benefit of a stylish workstation that still provides superior durability.

Adaptable power modules also make this unit ideal for temporary workstation needs or multiple user training rooms, as well as private office or small group settings. Storage options abound, adding further style and appeal while keeping workstations organized and worksurfaces uncluttered. Mobile pedestals and return tables allow for additional guests and impromptu collaboration.

In a world where the landscape of the workplace is constantly changing, AGATI keeps in stride by identifying two key constants: versatility and durability. AGATI understands the importance of being a resource and offers a solution that accommodates users of all types and anticipates the diversity of their needs.

Configurations illustrated represent just some of the possibilities for the Elements Desking System. Custom options upon request.

For more assistance in configuring Elements to your space, please visit agati.com or contact your local AGATI representative.
